

EPAY CARD MANAGEMENT

FastPay’s newly released in-app offering ePay Card Management, allows agencies and brands greater control, security, and management of multiple digital campaigns and cards with visibility all in one place.

Recently enhanced features include:

Fully Customizable Dashboard

- Tag cards with custom fields such as client campaigns and vendors to better organize transactions.
- Create “buckets” to identify cards by categories such as digital campaigns, production, or office expenses.
- Assign different permissions for creating, editing, and accessing cards.
- Full visibility on account status and balances.

On Demand Card Creation

- Create new virtual cards on demand and have them ready to use in seconds.
- Allow users to assign spend limits and merchant category codes.
- Input any critical data associated with the card.

Simple, Effective Reporting

Pull transaction summaries for individual cards or subset of cards

Card Creation Workflow

Greater control over card creation approvals provides added security

Low Balance Alerts

Customized email alerts and controls when cards are near spend capacity

Physical Cards

Request actual cards by mail when needed
