HOW IT WORKS

FastPay Political+ is our premium offering for political agencies looking to automate the buy to pay process. FastPay Political+ is a necessity for agencies preparing for 2024.

Strata integration allows agencies to quickly and seamlessly transfer media buy data directly to FastPay's ePay platform for review and processing, reducing unnecessary delays.

Our QuickBooks integration writes back all payment data to your QuickBooks account and vendor matching tech prevents saving duplicate vendor data. This keeps your system up to date and reduces time wasted on data entry.

Access to fully automated check services saves you time. Every FastPay check comes with a digital check copy sent directly to your preferred contact, embedded tracking numbers with status updates, and multiple shipping methods.

FastPay's card management module lets you create, manage, and reconcile virtual multi-use credit cards with ease. View all active cards in one place, manage campaign and client budgets, and access detailed transaction reports for streamlined reconciliation.

We worked with political agencies to design a refund management offering that streamlines the process. FastPay provides the same campaign buy data you include initially, so you can easily reallocate or identify funds by client post-campaign.

ABOUT FASTPAY

FastPay, an AvidXchange company, powers smarter payments across the media ecosystem. We're the largest political payments provider, processing over \$1 billion+ in transaction volume in the 2022 election cycle.
